1. Introduction

The Address Helper Plugin realized by SYNOLIA, helps you to quickly fill in Address Fields of all Modules.

The current Plugin knows Cities, Zip Codes and States of USA , France, Germany and Italy.

2. Installation

2.1. Requirements

In order to install and use the Address Helper Plugin you must have access to a SugarCRM version **5** with full administration rights.

This module is compatible with all SugarCRM flavors : **Open Source, Professionnelle et Enterprise.**

SYNOLIA can not be held responsible for any mistake in the cities/zipcode Database or if you don't find any city or zip code.

2.2. Installation

Address Helper Plugin is a classical SugarCRM module, you should install through « Module Loader ».

SYSTEM

Don't forget to run a "Quick Repair and rebuild" after.

3. How to use the Plugin?

As soon as the plugin is installed you can use it. In the Contact or Account edit view for ex. You will see a new field called "Address Helper".

If you enter any thing in this field, SugarCRM will suggest you a list of cities that starts with what you just entered.

You can search either by city name either by zip code.
