

Expose critical data right on the desktop, where it can't be missed.

> intelstream.net/r/klipfolio for details

New Features (5.0 build5899-16)

NEW Network and Data Performance:

- Failed connection attempts retry after 60 seconds
- Pipeline Klip compatible with various locations
- Now works with both My SQL and MS SQL installations
- Klips now make requests 100 records at a time

NEW User Interface Improvements:

- Call & Meeting Klips alert of missed calls/meetings
- New toolbar layout
- Updated Options window layout

NEW Updated to the latest KlipFolio Core:

- New developer tools (debug dialog, contextual trace/errors)
- Support for ClearType font-smoothing

Key features

Compatible. Works with hosted or in-house deployed versions of SugarCRM.

Alerts. Receive desktop alerts for upcoming calls, meetings, new leads, tasks, cases, and more.

Updates. See when new leads arrive, when they've been updated, when sales pipeline changes.

Interact. Sort, filter and apply actions to the data to personalize the dashboard and save time.

Search. Explore your entire SugarCRM database from the desktop.

Heads-up display. Keep your priority SugarCRM data visible regardless of what other apps are running.

Customize and extend. Developer API allows you to fully customize and extend the product.

Business benefits

- **Save time.** Spend less time digging for information and more time acting on it.
- **Gain awareness.** Preempt problems and respond to new opportunities in real time.
- **Act faster.** Improve response time to your hottest prospects.
- **Ensure CRM success.** Top priorities and performance data are highly visible and accessing SugarCRM is simplified.
- **Elevate CRM value.** Give senior managers "at-a-glance" visibility into KPIs to elevate the value of Sugar in the enterprise.
